

# MITESH BHAGWANT

Ahemdabad, Gujarat (380015) — miteshbhagwant@gmail.com — +91 97255 46627 — linkedin.com/in/mitesh-bhagwant — India

## EDUCATION

### Parul University

Technology in Information Technology, **7.0 SPI**

**Aug. 2021 — April 2023**

Vadodara, Gujarat

### Lukhdhirji Engineering College,

Bachelor of Engineering in Information Technology, **7.09 CGPA**

**Aug. 2016 — June 2020**

Morbi, Gujarat

## SKILLS

- **Programming Language:** JavaScript, C, C++, Python
- **Frontend Development:** React.js, Next.js (Page Router & App Router), Remix.js, HTML, CSS, Tailwind CSS, Bootstrap, Material UI, Joy UI
- **Backend Development:** Node.js, Express.js, REST API, GraphQL, Webhooks
- **Database Management:** PostgreSQL, MongoDB, MySQL, Firebase
- **Tools & Technologies:** Postman, GitHub, Git, Visual Studio Code, Shopify API, WhatsApp Cloud API
- **Soft Skills:** Never Give Up Until Find Good Solution, Adaptive Learner, Collaborative, Detail Oriented, Good Communicator, Curious.

## Experience

### Avidbrio| Ahemdabad

**July 2024 – Present**

- Developed Shopify Remix.js apps to enhance e-commerce functionality and improve store performance.
- Built **custom Shopify apps** using **Node.js** and **Next.js**, integrating with Shopify's Admin API and storefront API.
- Worked on Shopify Headless Commerce using Next.js, optimizing for speed, flexibility, and scalability.
- Solved complex Shopify challenges, including checkout customizations, API rate limit handling, and dynamic product filtering.

### Infinitie Technology | Bhuj

**Dec 2023 – July 2024**

- Designed and developed responsive, feature-rich web applications using Next.js and Material UI.
- Developed a Node.js application with SQL databases and Firebase for real-time data synchronization.
- Built and optimized **admin panels** using **Next.js**, **React**, and **Material UI** to enhance user management and reporting.
- Integrated **authentication and role-based access control (RBAC)** to ensure secure user access.
- Improved application performance by **30%** through caching strategies and efficient database queries.
- Worked on real-time data updates and notifications using Firebase Cloud Messaging (FCM).

## PROJECTS

### Furnicraft | [Project Link](#)

**March 2025**

- **Tech Stack:** Next.js (ISR), Airtable API, Tailwind CSS, Stripe
- Built a **fully functional eCommerce platform** using **Next.js ISR** with **Airtable as a backend**, eliminating the need for a traditional database.
- Integrated **Airtable API** for dynamic product management and seamless data retrieval.
- Designed a **custom checkout flow** with **Stripe Payment integration** for secure transactions.
- Developed a **fully responsive UI** using **Tailwind CSS**, ensuring a smooth experience across all devices.
- Created a **custom product details page** with optimized performance and a user-friendly interface.
- Fully **dynamic architecture**, ensuring efficient content updates and scalability.
- Personally designed the platform, applying UI/UX best practices for an intuitive shopping experience..

### Komuso Design| [Project Link](#)

**Jan 2025**

- **Tech Stack:** Next.js (ISR), Shopify Storefront API, Next.js Admin API
- Built a **Shopify headless eCommerce store** using **Next.js ISR** with **tag-based validation** for optimized performance.
- Developed a **custom Next.js Admin API** for seamless Shopify store management.
- Integrated **Shopify Storefront API** for dynamic product fetching and checkout flow.
- Optimized discount processing, enabling **bulk product discounting** with improved performance.
- Ensured smooth integration with Shopify's ecosystem, making **scalable and easy to maintain**.
- Achieved a **100 Google PageSpeed Insights score** through performance optimizations.

- Fully **dynamic architecture**, ensuring efficient content updates and scalability.
- Implemented **useOptimistic hook** for a smooth and responsive **cart update experience**.

#### Saski Collection | [Project Link](#)

Feb 2025

- **Tech Stack:** Remix.js, Shopify Functions, Polaris, Shopify Metafields
- Developed a **custom Shopify discount app** using **Remix.js** and **Shopify Functions** to apply **order and product-based discounts** dynamically.
- Built an **intuitive admin interface** with **Polaris UI**, allowing seamless discount management.
- Integrated **Shopify Metafields** to store and manage discount configurations efficiently.
- Optimized discount processing, enabling **bulk product discounting** with improved performance.
- Ensured smooth integration with Shopify's ecosystem, making the app **scalable and easy to maintain**.

#### eRestro - Single Vendor Restaurant | [Project Link](#)

Jan 2024

- **Tech Stack:** Next.js, Material UI, CodeIgniter, SQL, Firebase
- Built a restaurant management system with a user app, delivery app, and admin panel, ensuring seamless order processing and business management.
- Implemented real-time order tracking, multi-payment support, OTP-based delivery verification, and geofencing-based restaurant filtering for enhanced user experience.
- Integrated **wallet transactions, rider management, and earnings tracking** to streamline financial operations.
- Developed role-based access control, multilingual support (RTL & LTR), and advanced search (text & voice) for improved usability.
- Designed a modern, responsive UI with 50+ pages, ensuring a smooth experience across platforms.

#### Medsers | [Project Link](#)

Feb 2024

- **Tech Stack:** Next.js 14, Vuexy, WhatsApp Cloud API, Firebase, SQL
- Developed an **online medicine delivery platform** enabling users to upload prescriptions and place orders directly via **WhatsApp Cloud API**.
- Implemented a location-based search to find the nearest pharmacy within a 5km range, ensuring fast and efficient deliveries.
- Built an **admin panel using Vuexy in Next.js 14**, allowing **pharmacies to manage orders, track deliveries, and update inventory**.
- Integrated **real-time order tracking, automated prescription processing, and multi-store management** for seamless operations.
- Optimized backend performance and API communication for faster response times and better scalability.
- Added **automated order assignment**, where the system intelligently assigns orders to the nearest available pharmacy for quicker processing.

#### ImageCivil | [Project Link](#)

Aug 2023

- **Tech Stack:** HTML, Tailwind CSS, Vanilla JavaScript
- Developed a **portfolio website** to showcase **civil engineering projects and achievements**.
- Designed a **modern and interactive UI** with **Tailwind CSS** for a seamless user experience.
- Implemented **smooth navigation** and **interactive elements** to enhance project exploration.
- Optimized for **performance and responsiveness**, ensuring accessibility across all devices

#### useMovie | [Project Link](#)

Sep 2023

- **Tech Stack:** React, Tailwind CSS
- Developed a web application for movie information using **React.js**, integrating **OMDB API**.
- This provides users with a way to explore movies, rate them, and manage their watched movies list.
